

How to Get Keisha's Makeup Look

Preparing

Step1

Wash your face well and apply [moisturizer](#) if you normally use it.

Step2

Use a concealer for problem areas. If you have dark circles under her eyes I advises that you apply concealer here, as well as on blemishes and around the mouth.

Step3

Warm the concealer on the back of your hand to make it creamy and easier to apply. Gently dab it on the [skin](#).

Applying Foundation

Step1

Use a makeup sponge to apply foundation. I recommend soaking the sponge in water. Squeeze the excess water out and dab onto foundation.

Step2

Apply makeup with a foundation stick instead of using cake or liquid. Smooth in with the sponge. Cover your forehead, nose and chin.

Step3

Pat your entire face gently, including where you applied the concealer. Blend in well, making sure to blend downward and underneath your chin.

Setting Makeup

Step1

Apply two shades of translucent powder on your face. Use a large, soft powder brush to apply the lighter powder under your eyes and brush away any excess powder.

Step2

Set your foundation with the darker powder applied lightly over your entire face using a second brush and, again, brush away any extra powder.

Step3

Grab a third powder brush. To apply your blush dab your powder brush into the blush. Pat the brush on the back of your hand to remove the excess blush.

Step4

Find the best area to apply the blush by smiling to reveal the apples of your cheeks. Blend the blush in carefully.

Applying Eye Shadow

Step1

Brush a thin layer of lighter translucent powder under your eyes, I recommend, protecting the area from your eye shadow, which can fall onto that area as you apply it and create dark under eye circles.

Step2

Choose a shade of smoky brown eye shadow that is slightly darker than your natural skin tone. Dab a small brush on the eye shadow and rub the brush on the back of your hand to remove any excess just as you did with your blush.

Step3

Create a dramatic, cat-like effect by first tilting your head back. Look down to see the crease of your eye. Brush the shadow back and forth onto the crease. Continue towards the outer corners and slightly beyond the eyes.

Step4

Deepen the eyes and add a polished look by dabbing the shadow at the inner corners of the eyes. Sweep it upward to the brows.

Step5

Brush off excess under eye powder.

Defining Eyes

Step1

Make your eyes look bright and big by applying white eyeliner on the inside of your lower lid. White eyeliner is the best investment a woman can make because it makes you look vibrant even when you are tired.

Step2

Apply one coat of mascara to your top and bottom lashes, which keeps the lashes from getting clumpy. To emphasize your bottom lashes, touch the mascara brush to your lower lids as you apply it.

Step3

Use an eyelash curler after you apply mascara to make your upper lashes look longer. Squeeze the curler two or three times to curl the upper lashes. Wipe excess mascara off the curler after each use.

Finishing Touches

Step1

Create a polished look for your eyebrows. Use an eyebrow pencil to draw hair stroke lines in sparse areas of the eyebrow, and pays special attention to the arch. Follow the natural curve of your brows and use a color that closely matches your own.

Step2

Add a finishing touch of lipstick or lip gloss. Apply it sparingly to get a stained effect. Rub your lips together and smudge the lipstick or gloss with your fingertip for a more natural look.

Step3

Wash off the excess blush and shadow you tapped off your brushes onto the back of your hand and the lipstick or gloss from your fingertips. You are ready to show off your fresh and fierce Keisha's makeup look.
